

Low-threshold collaboration & self-organization

36c3 / 30 Dec 2019

Setting: Self-organized group

- People with different backgrounds
- Open participation and alternating members

Think civic group rather than enterprise team

Problem: Overload

 "Please sign up for Tasky to access our to-do list and Polly for polls"

 "Also install Notesy for our knowledge collection and Meety for meetings"

 ??

Problem: Overload

👤 "Please sign up for Tasky to access our to-do list and Polly for polls"

👤 "Also install Notesy for our knowledge collection and Meety for meetings"

👤 ??

Problem: Complexity

👤 "Please sign up for our groupware by following this user manual"

👤 "There is also a 4 hour video tutorial available"

👤 ??

Assuming the group even has the skill or money to operate a groupware

Problem: Usability

Problem: Complexity

👤 "Please sign up for our groupware by following this user manual"

👤 "There is also a 4 hour video tutorial available"

👤 ??

Assuming the group even has the skill or money to operate a groupware

Problem: Usability

👤 "Here is the collaborative document for our tasks"

👤 "Assign your name in column 3, check it off with an X, but *never* delete the row"

👤 ??

AKA good tool used for unintended purpose

Problem: Usability

👤 "Assign your name in column 3, check it off with an X, but *never* delete the row"

👤 ??

AKA good tool used for unintended purpose

Problem: Collaboration barrier

Overload, complexity and / or usability issues lead to:

- Not all members taking part in collaboration
- Use of limiting tools (*Yay, more emails!*)

Self-organization often calls for various lists
